The 4 biggest cleaning tips ever

THE 4 BIGGEST CLEANING TIPS EVER

You can clean in many different ways. We list the four most important cleaning lessons for you. Which of these ways you use, vary from person to person. A combination of these 4 tips will give you the cleanest result!

1. CLEAN AS YOU GO

The clean as you go-method is the best way to keep your house clean with minimal effort. You try to clean up or keep clean everything after you're done. Make it a habit to put your stuff in the right places. This makes sure there is less stress, more time in the future and makes sure the clutter doesn't pile up.

Some examples:

- Empty tube of toothpaste? Don't put it on the sink but throw it away immediately.
- Dirty clothes go in the laundry basket instead of on the ground.
- Don't postpone doing the dishes and put everything in the cupboards right away.
- Throw your wrapper in the bin right away.
- …

2. THE RIGHT ORDER

The second most important rule is to create your own order. Map out a smart cleaning route through your house. That's more effective than just starting to clean randomly. Because you get used to it, it will all go a lot more efficient with time. One person can prefer starting in the bathroom, while the other would want to start in the bedroom.
It's especially important to clean upstairs before you clean downstairs. So, start in the attic and work your way down. That way, you don't forget anything and you don't get confused. You don't want the dust of the table on the cleaned floor. Always start with cleaning dry as well, before you get your bucket of water.

3. SPEED CLEANING

Cleaning doesn't have to take long. By speed cleaning, you can get a lot done in a short amount of time. Something that is still clean, doesn't have to be cleaned again, that's how you gain time! Clean what you have to clean, nothing more and nothing less. Here you can find some timesaving tips to clean your house in 60 minutes:

- Put on some loud music during cleaning. It will give you a boost!
- Make a cleaning schedule
- Put a timer or cooking alarm per room and don't exceed this time. Clean every room quickly:
  - Bathroom (15 minutes)
  - Bedroom (15 minutes)
  - Kitchen (15 minutes)
  - Living room (10 minutes)
  - Toilet (5 minuten)
- Take all your cleaning materials at once. That way, you don't lose time by having to go back all the time.
- First begin with the most annoying cleaning tasks. So, when they're done, you can do the more pleasant tasks.
- Multi-task! Let Feem do its job, while you do something else
- It was already mentioned, but work from up to down and from dry to wet!

Clean a lot in a short amount of time

It's a real challenge, but 60 minutes obviously isn't enough time to get everything clean and cleaned up. It is very handy to get everything in general in order. When you practice this, you work your way through your house speed cleaning in an hour. You will see you create a lot freer time by doing this.

4. DO NOT POSTPONE

Last but not least, avoid postponing! You'd rather do other things than cleaning. But by doing everything, the work in and around your house will just pile up and your house will never really be clean and cleaned up. Just start somewhere. All small bits help and doing something is better than doing nothing!
