

## CLEAN ECO-FRIENDLY WITH FEEM

In our modern society, our care for the environment is getting more and more important. When doing domestic work and daily maintenance toxic and hazardous substances are an increasing nuisance on our environment. Aiming to have the **least impact on the environment** is a **continuous process** that has to be pursued in every way!

Since the introduction of Feem, we genuinely care about the environment. **Cleaning healthily** is one of our top priorities. That's why Feem has released a user-friendly cleaning product that you can use for all the cleaning tasks you can think of. That way, you don't have to get a cupboard full of different, harmful products and you can save a lot of money.

The super-efficient Feem Active Cleaner is carefully made without additives of unnecessary hazardous substances. It's biodegradable and doesn't contain phosphates. We chose not to add perfume or colouring agents to limit the impact on the environment. Feem Active Cleaner is a concentrated product so you only need a small amount and one packaging can be used for longer. That way, there is less waste. Furthermore, it's also available in packages up to 20 litres, so the packaging material is being limited as well. That way, we would like to show that the environment and top quality can perfectly go hand in hand!

Our vision is that different kinds of cleaning products in your cupboard are unnecessary. On top of that, the pile of packaging material is very bad for the environment. Feem's all-purpose cleaner makes sure you can solve all the cleaning issues at home with one product!
